# Vincent J. Garcia

*Full-Stack Developer*  **Portfolio**  **LinkedIn**  **GitHub**  **garciajvincent@gmail.com**  **(818)-447-4520**

## SUMMARY
Versatile full-stack developer and data analyst who passionate about emerging technology. An optimistic who is able to inspire others to embrace uncertainty and obstacles. An advocate for quality, open-source collaboration, clean code, and screen-reader accessibility.

## WORK EXPERIENCE
**Associate, iManage Testing at Warner Bros., Burbank, CA**                **April 2019 - Present**
- Cleansed 600,000 documents by using Excel 2016 to convert historical data from eDOCs to iManage.
- Test enhancements by collaborating with project managers and directors in Enterprise Technology.
- Reduce labor hours for SAP program management by automating the project initiation process using Microsoft Flows and PowerApps.

**Junior Developer at NeighborNosh Inc., Los Angeles, CA**                **April 2018 - Present**
NeighborNosh Inc.:  Smart-vending machine startup on Android and iOS systems.
- Design the client-vending UI for 3rd party clients by using React, Material-UI, and CSS.
- Debug Node.js Backend to vend 100+ products per day by collaborating with the company CTO.
- Spearhead NeighborNosh website to showcase chefs and machine locations by utilizing React, Redux, and Node.js.

## TECHNICAL AND SOFT SKILLS
**Frontend:** JavaScript | React.js | Redux | Material-UI | HTML5 | CSS
**Backend and Deployment:** Node.js | Express.js | Python | Heroku | Chai | Mocha | Enzyme
**Database:** Mongoose | MongoDB | SQL
**Other Programming Technologies:** Debian Linux | React-Native | RESTful APIs | Git | GitHub | BitBucket | TravisCI | Jira | NPM
**Communication and Leadership:** Agile/Scrum Methodology | Mentoring

## FULL-STACK DEVELOPER PROJECTS
**HexClothes (in production) | GitHub-Client | GitHub-Server**
- Develop a full-stack web application for users to create outfits to complement their skin tone by using React, Redux, and Node.js.
- Implement Unit Testing to ensure components are rendering by using Mocha, Chai, and Enzyme.
*Utilized:* React.js | Redux | Node.js | Express.js | MongoDB | Chai | Mocha | TravisCI | CSS | Git | Heroku Deployment

**Captains Log | GitHub | Demo**
- Developed a web application to allow users to journal vacations by using Node.js and MongoDB.
- Designed Unit Testing to check user authentication by utilizing Mocha and Chai frameworks.
*Utilized:* Node.js | Express.js | MongoDB | Chai | Mocha | TravisCI | CSS | HTML | Git | Heroku Deployment

## EDUCATION AND CERTIFICATION
**Dapp University Blockchain Developer Bootcamp October 2019**

**Thinkful Flexible Full-Stack Web Development Program December 2018**

**University of California Los Angeles, June 2017**
*Bachelors of Arts*; Cumulative GPA: 3.113, Major GPA: 3.54
